

# Friends Fly South

Friends Fly South, f.k.a Rayziano & Friends, is a collective of guys from around the Hattiesburg, MS area. Made up of 7 people with completely different backgrounds, the band still functions beautifully with cohesiveness. They have been together two years and continue to grow. At the beginning they held a bi-weekly show at Hattiesburg's well know Thirsty Hippo. The band consists of some of the top musicians respectively from the University of Southern Mississippi and the Hattiesburg music scene.

Stylistically the band has pulled from their influences such as Snarky Puppy, The Funky Knuckles, Marcus Miller, The Meters, and Weather Report to create a sound that takes those elements and creates something special. It definitely stands out with the band being from Mississippi. They released their first album "Start of Something New" in September 2014 under the name Rayziano & Friends and began the challenge of making this a full time thing.
